

Model 7000 Tram People Mover

Efficient . Customized . Versatile

The Model 7000 is the latest tram in TI's line-up. The economical, gas-powered people mover is ideal for venues requiring lower passenger capacity. It seats 25 passengers or 15 passengers plus two wheelchairs when customized with our ADA compliant wheelchair package.

The open-air design is a healthy alternative to an enclosed vehicle that recirculates air.

A low floor, just 14" off the ground and no steps, makes for easy and safe loading and unloading.

The 7000 is designed to meet your modern transportation needs for today's evolving market. For more information on pricing contact (562) 231-1770 or sales@tramsinternational.com.
